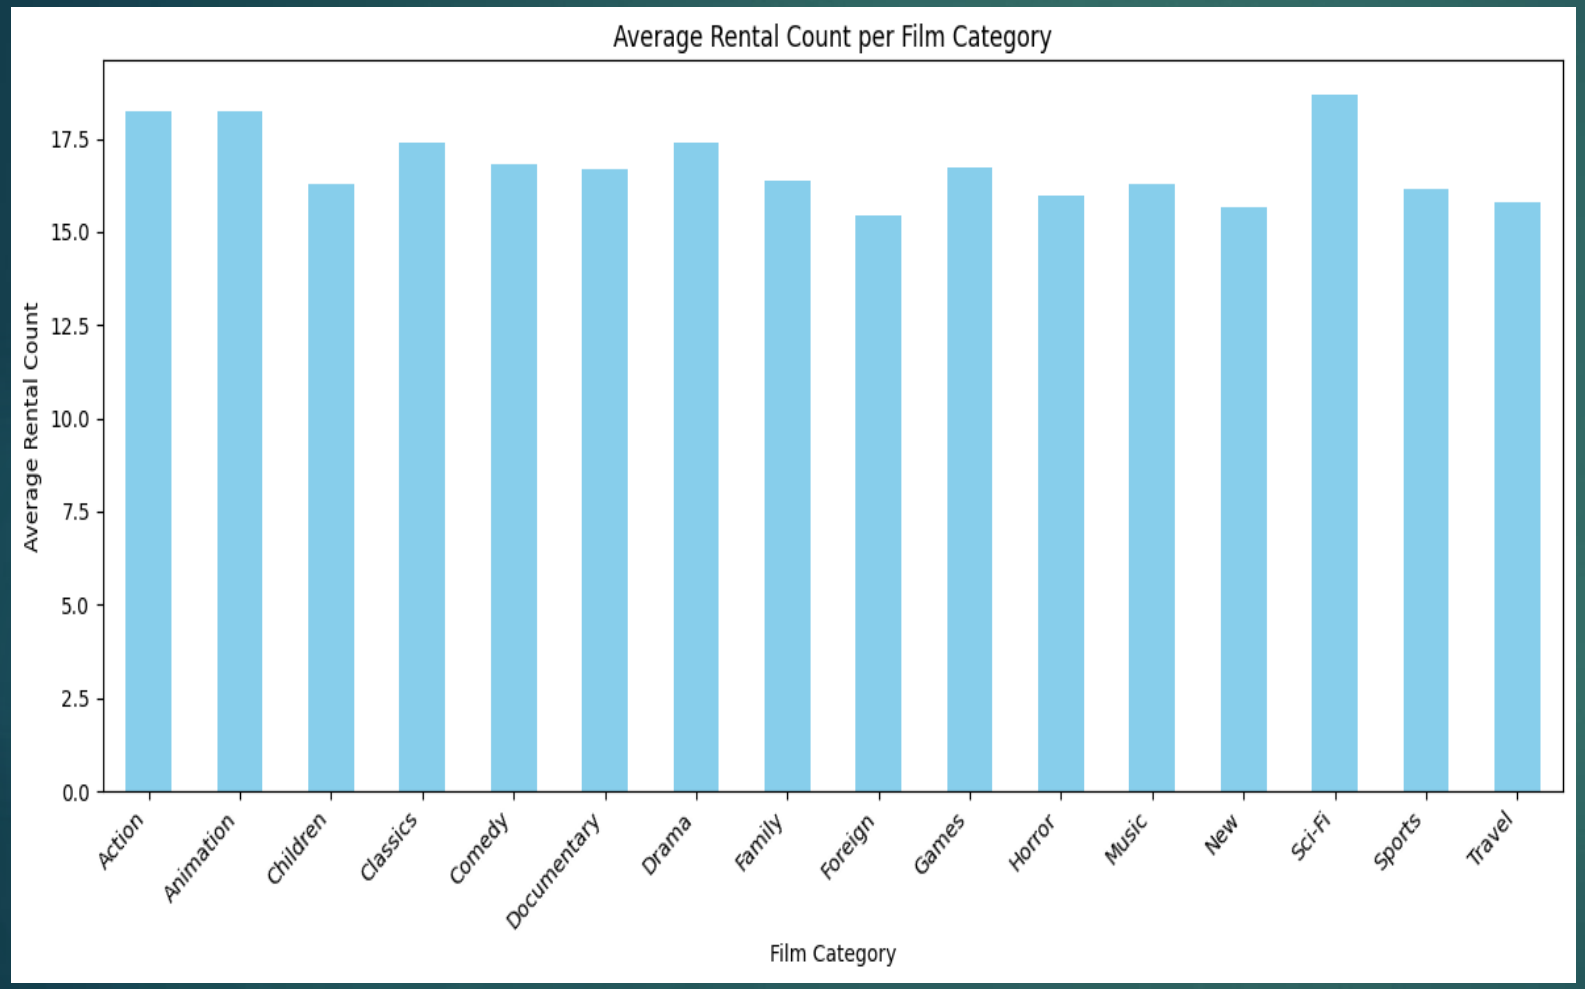
Which category is the most detailed among the various films?

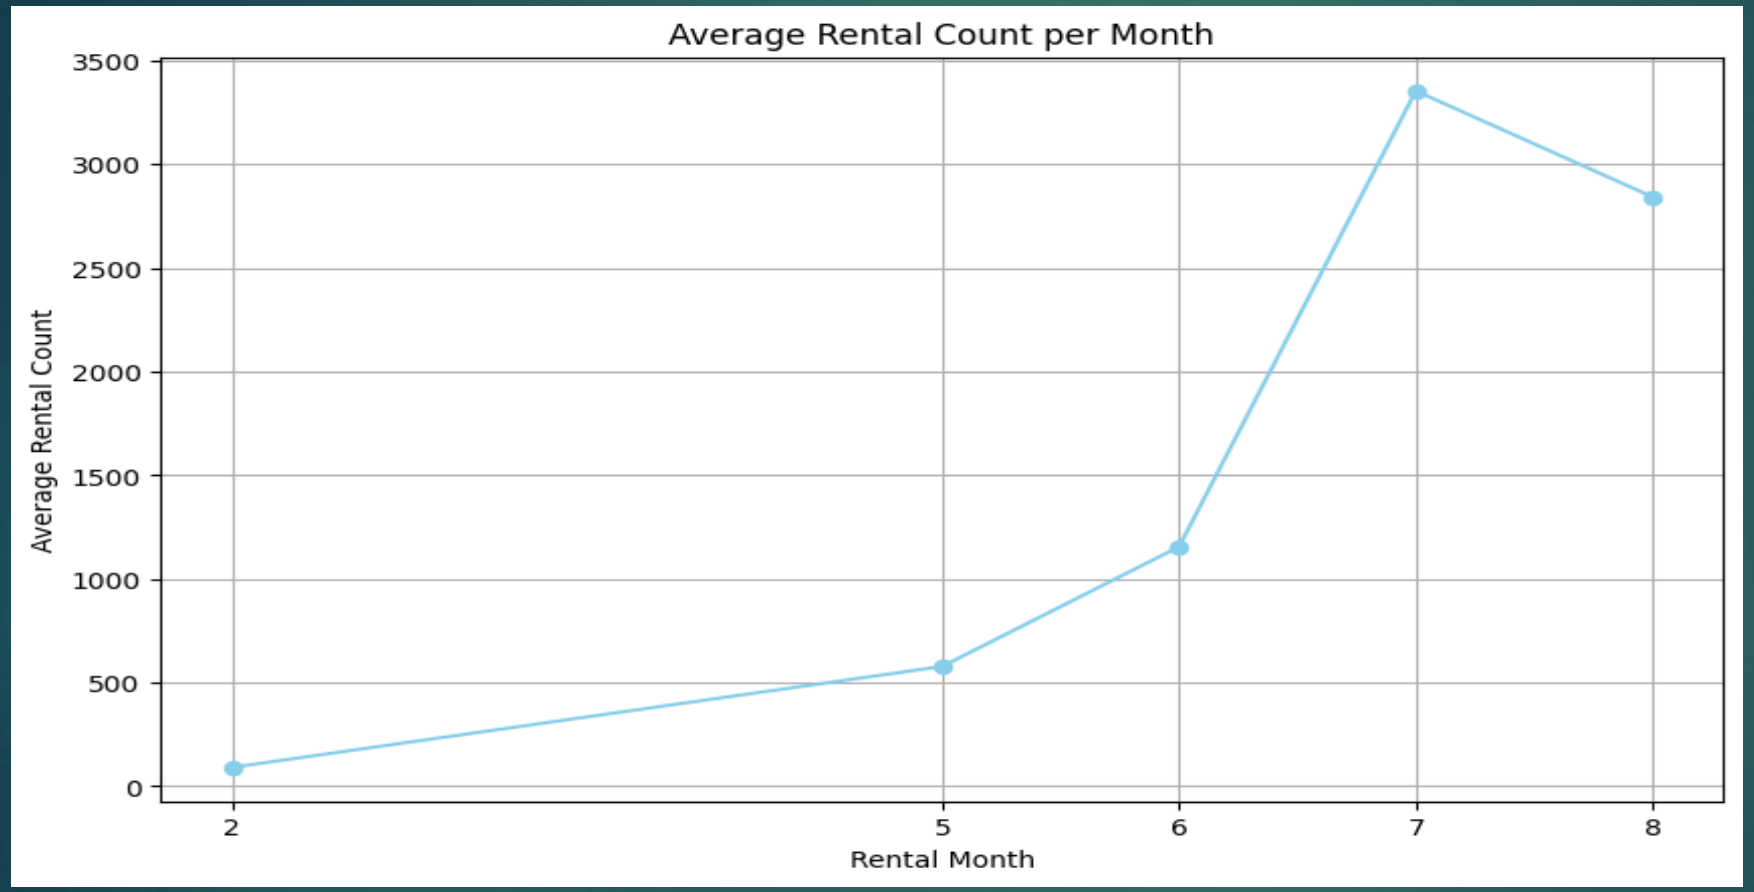


The graph shows the average number of rentals per film category.

For example, the **Sci-Fi** category has the highest rental rate compared to the rest of the categories, while some other categories like Children or Music have slightly lower rental rates.

Set1/Q1

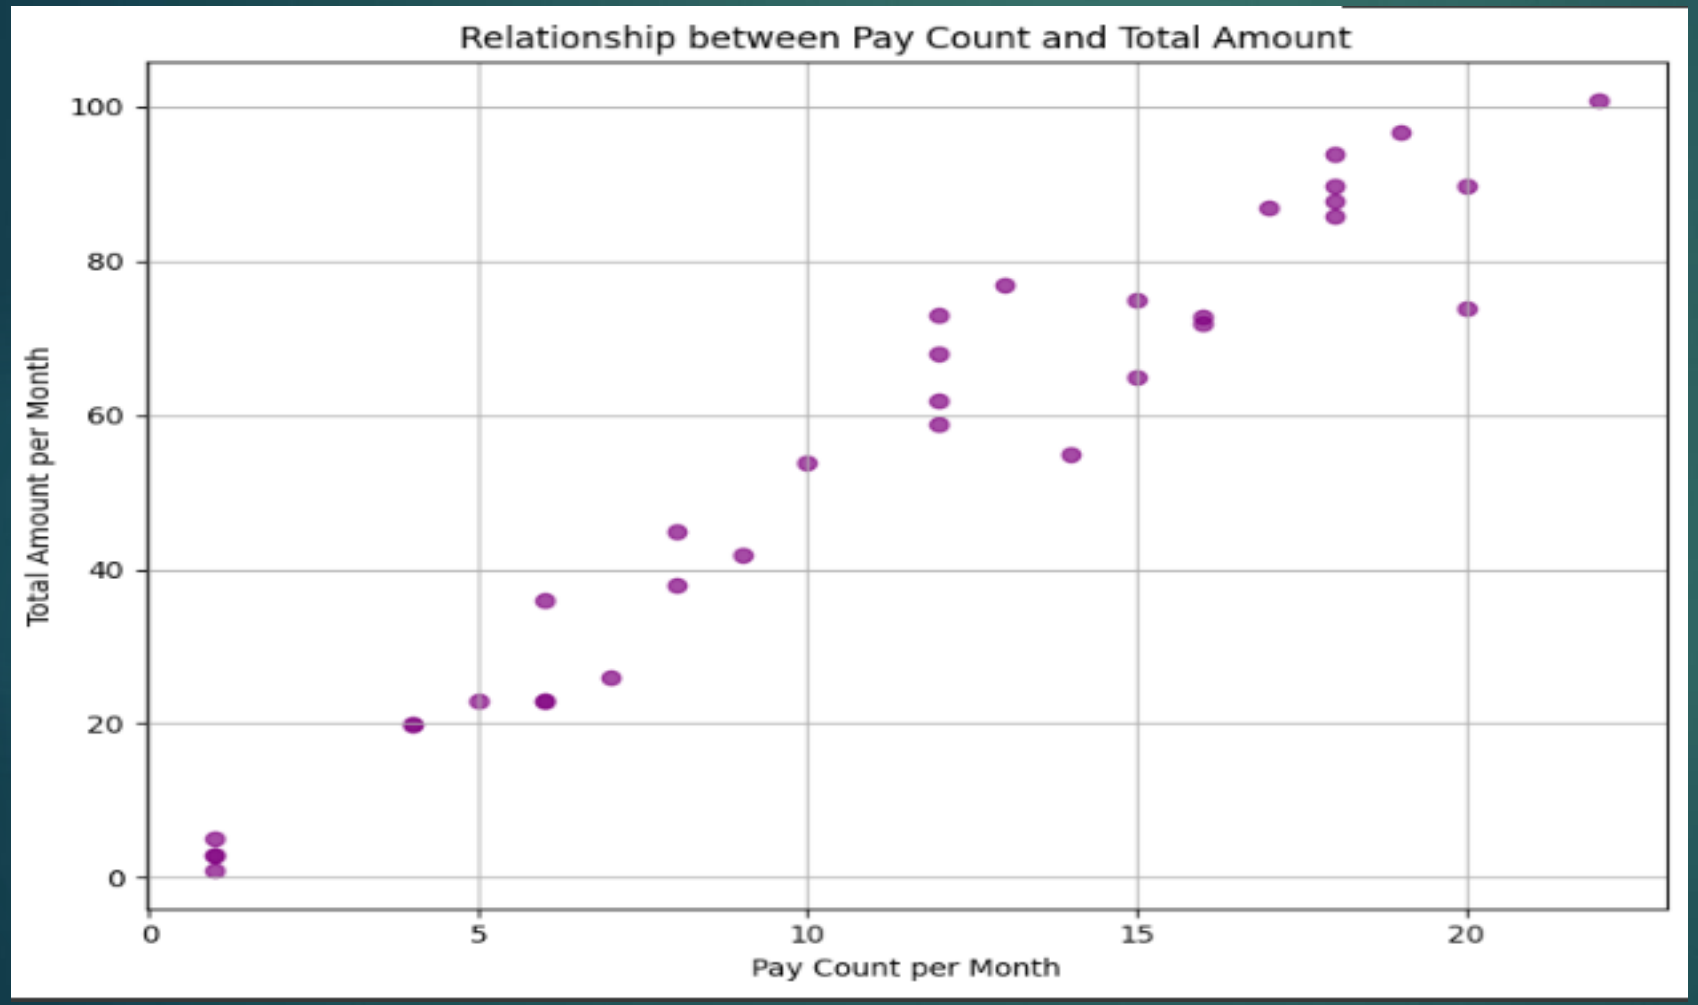
How does the average number of rentals change over the months?



The graph shows the average number of rentals per month. We observe a gradual increase in the number of rentals over the months, with a sharp increase in the seventh month and a slight decrease in the eighth month. This indicates a seasonal pattern in rentals.

Set2/Q1

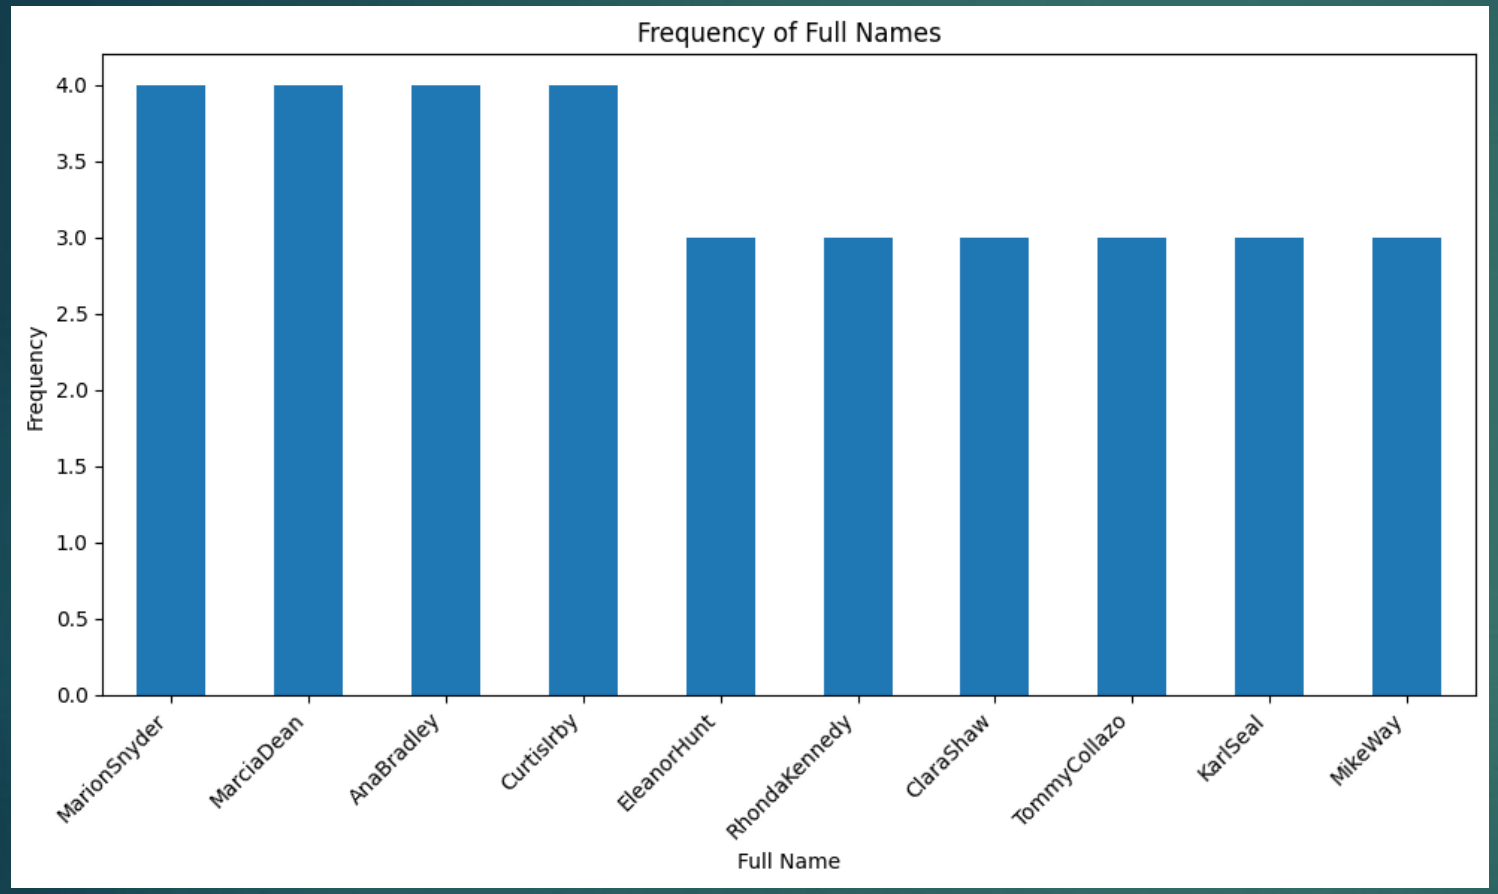
How does the number of monthly payments affect the total amount paid?



The chart shows a direct relationship between the number of monthly payments and the total amount paid, meaning that the higher the number of payments, the higher the monthly spending.

Set2/Q2

What are the most frequently appearing full names in the data?



The chart gives us a quick view of the most common names and their frequency in the data, which helps in analyzing the distribution of names within a given data set.

Set2/Q3
